

The Monthly Amunategui.GitHub.io and ViralML.com Newsletter

March 27th, 2019

Hello Friends!

Thanks for subscribing to the ViralML/Amunategui.GitHub.io newsletter. I wanted to squeeze this in before the end of March. A lot has happened. I rebuilt the ViralML.com website once again. It is still Mobile First but now serves primarily as an index for my videos. I went with an ultra-simple model that should help people find video material quickly. Let me know what you think.

New YouTube Stock Market Analysis with Python Series:

I stepped up my video material and created a popular hands-on financial series with Python. The goal is to build simple financial indicators to get a feel for the markets anytime desired. So far we've explored the S&P500, VIX, unemployment, interest rates, inflation and much more. Click on the "[Finance](#)" button on ViralML to follow along.

My Two Most Popular Videos Since the Last Newsletter Were Both About Current Events in the Tech Space:

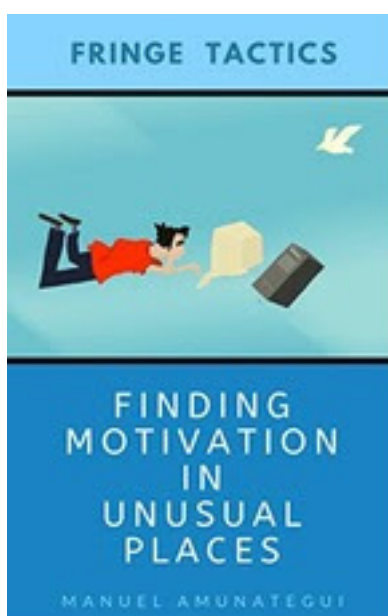

[Oracle Layoffs - Will Tomorrow's Database Will Be Online Only?](#)

Oracle layoffs, tomorrow's enterprise databases will be cloud only - and how a bad reputation will always come back to haunt you.

[Deemed too dangerous, OpenAI won't release their latest text generating model GPT-2](#)

OpenAI's latest text generating transformer model "GPT-2" output is so difficult to differentiate from that of a human that they won't release the trained model in the public domain.

New Book on Motivation:

I also have a new book out called "[Fringe Tactics - Finding Motivation in Unusual Places: Alternative Ways of Coaxing Motivation Using Raw Inspiration, Fear, and In-Your-Face Logic](#)".

Email me if you are interested in a free copy and I would also highly appreciate any honest reviews about it on Amazon.com

Thanks for your support!

[Downloadable eBook "Become a Data Scientist"](#)

Here is the link for those looking for my free eBook, Become a Data Scientist: Essential Tips to Complement your Technical Studies. Let me know how you like it and best of luck with your exploration of data science. It's a fantastic field where we feel like students every day.

Thanks for your continued interest and support!
