

## The [ViralML.com](https://viralml.com) Newsletter

June 29th, 2019

Hello Friends!

Summer is officially here! And let me tell you that it's really hot in Barcelona. Here are a few exclusive videos on finance and market analysis using Python. I will keep exploring this space that will lead to the eventual videos on backtesting and measuring how these fundamental indicators can enhance simple trading systems. As announced in my last newsletter, these will be part of a new Udemey class coming out later in July and a new book by the end of the summer. I'll keep you all posted!

### Pre-release YouTube Videos Exclusive for Newsletter Subscribers:

#### [High Level Look at Real Estate - Hands-On Market Analysis with Python](#)

If you want to know about the US real estate then here are the three main data sources that I mine on a regular basis.

#### [Let's Explore the On-Balance Volume Indicator - Hands-On Market Analysis with Python](#)

I like this one because it is simple and uses volume instead of only relying on price like a lot of other technical market indicators out there.

#### [Searching for Patterns in Market Data and Backtesting - Part 1 - Hands-On with Python](#)

Let's look at some simple concepts to create market features and catalog patterns. In this series, I'll show you a variety of ways to identify and measure market patterns.

### Popular Videos Since the Last Newsletter:

#### [Fakes and Deep Fakes - What's Going On? What's The Impact?](#)

Where are we at in terms of capabilities and how is it affecting people so far. Let's also think about how bad seeds may look towards these tools to manipulate us.

#### [Downloadable eBook "Become a Data Scientist"](#)

Here is the link for those looking for my free eBook, Become a Data Scientist: Essential Tips to Compliment your Technical Studies. Let me know how you like it and best of luck with your exploration of data science. It's a fantastic field where we feel like students every day.

Thanks for your continued interest and support!
